

NOTICE FROM TCEQ'S AIR PERMITS DIVISION

As a regulated entity with a temporary permit or a permit without an expiration date, you are now required to annually report your operational status to TCEQ.

Learn more about Senate Bill 1397, implemented in the last legislative session, which includes an annual reporting requirement for permittees with temporary or "open-ended" permit status.

Your initial operational status report must be submitted by no later than December 31, 2024, for each relevant permit by rule and standard permit registration you maintain. Annual reporting will be required by December 31 of each year thereafter.

Operational status should be reported electronically through the State of Texas Environmental Electronic Reporting System at www3.tceq.texas.gov/steers.*

**STEERS functionality, as well as guidance to assist you with reporting, will be available in the fall of 2024.*

Subscribe to "**Annual Reporting Requirements for Certain Air Permits**" (under Air Permitting) to receive further instructions and updates related to this reporting requirement:

www.tceq.texas.gov/goto/subscriptions

**For questions concerning this new requirement
call Air Permits at 512-239-1250.**
